

# Can and Should an US-Uprising be Prevented?

## The Poverty

The Americans cannot close their eyes for it much longer: USA is coming closer to the status of a Third-World-State. The extremely rich are getting richer but the poor part of the population can only notice an increase in their number. Recession is coupled with the housing crisis, by which through foreclosures an incredible amount of citizens are made homeless and the middle class is thinned out.

The financial crisis of 2008 harmed a few bankers and very many 'lay people,' to which group must be counted a large spectre from wealthy investors (now less wealthy) to people on marginal living conditions before (but manifestly empowered after) the crisis. By strange criteria, the American Government (and several others with it) decided to bail-out some large banks while hundreds of others smaller ones were left to fail.

## The Colony

In the middle of this approach to public bankruptcy, at least \$ 3 billion annually flows to Israel, generally used for purchase of weapons for the country's perpetual warfares. Ironically, "America guarantees Israel's security," but not that of its neighbouring countries (Lebanon, Egypt, Syria, Jordan, Libya, Tunis, Sudan, Iraq, Iran, Turkey, Qatar) which it – along with the US itself (USS Liberty, Free Gaza Flotilla) – feels free to attack whenever suitable. This solidarity with the most aggressive statehood on earth has been guaranteed in written, signed by  $\frac{3}{4}$  of the members of congress, both senate and house.

This incredible treason – putting a foreign state's welfare before the ones to which the parliamentarians were elected can be characterized no other way – was the result of decade-long lobbying work of foremost AIPAC and ADL, among other Jewish Zionist organizations. Compare it with the fact, that less than 2% of the citizens of the USA are Jews and among them a significant part are not Zionists (i.e. supporting Israel's colonization efforts – mildly expressed).

The only state (I am deliberately not speaking of a Nation) which is tolerated for double citizenship with the American one is Israel. Many high officials and even some politicians in the American administration have such.

Beside the economical and military support, Israel enjoys complete political support from the United States, which blocks all marginally adverse resolutions in the UN Security Council; nevertheless, Israel feels free to ignore all 'binding' resolutions also after the prostitution of the USA (e.g. the one ending the 2<sup>nd</sup> Lebanon War). It has therefore been clear to everyone who dares to open their eyes that USA has effectively turned into an Israeli colony.

## The Israeli part in 9/11

Slowly, it emerges that an abnormal part of the atrocities committed on 9/11 were carried out by, or with the assistance, of Israeli (including Americans with a double Israeli-American citizenship). The city of New York was hardest hit by this massacre, with almost 3,000 immediate and so far, in the first 9 years, almost another 1,000 from diseases caused by the toxic fume inhalation, with many more to come [1]. 410,000 were heavily exposed.

It must be feared that 9/11, which was co-orchestrated by Israel as part of a global anti-Islamic propaganda campaign, may give rise to a wave of anti-Semitic sentiments. It should be kept in mind, that there were many American Jews among these victims. More

reasonable is, that this recognition backfires on the colonial power, forcing it to weaken its strangling grip on the American society. It is difficult to imagine how this can be carried out by peaceful means.

Below is an unusual attempt to detect the responsibilities for 9/11 between American and Israeli authors. For documentation of these claims, see the referred sources.

## Treatment of the Soldiers and Veterans

Until recently, the death-toll in Iraq was kept carefully manipulated to an unbelievable ~4,500 soldiers. This only counted those who were killed immediately on site, but the majority, who died with a delay during transport or in the hospital, were not counted in this statistic. New figures from Dept. of Veterans Affairs Reports yields ~73,000 U.S. Gulf War Deaths [4], to be compared with the Vietnam War's 58,000 American fatalities. To that come the invalidating injuries: traumatic brain injury, amputations, depression (suicide [5]) and illnesses relating to the exposition to depleted uranium. The war has officially ended but fighting continues and there is still an army of 50,000 soldiers in Iraq – and a larger one in Afghanistan, while Israel demands (and possibly provokes) another war against Iran. At the other side, we find much higher figures of victims to an excessively violent and primitive ruling, but that may be considered another time.

How does the American homeland great their war-heroes? Many (most?) land among the vast masses of homeless and unemployed humans. The seriously wounded are discharged and the time-contract considered breached by the soldier, resulting in financial reclaim. To the injury is added another insult if material was damaged or lost in the battle, since this is then demanded replaced. A number of reports illustrates that this shameful practice may be of general character.

## Conclusion

The mood in the American population is approaching a dangerous boiling point. The available politicians are today not posing a security valve for the many losers in society, and the upcoming mid-term election will not reflect their mood. If, however, the population finally understands the roots of 9/11, a virtual uprising is likely. Its consequences will be unpredictable, as revolutions have always been. To address the title of this article: Whether or not an uprising should be prevented loses importance with the fact that it probably cannot be. Get the best out of it!
